

March 19th 1994

Dear C Span,

I guess you know by now I watch C Span and CNN and Headline News all American Cable TV News - Why? cause you are not afraid to say or show anything - too bad you weren't there with Cameras and Peter Arnet in the beginning of Iran Contra - but you were there during the Iran Contra Congressional Hearings. I still can see Oliver North in his decorated Marine Uniform standing tall with raised hand Swearing to tell the truth nothing but the truth and his spotted Plant Attorney making fools out of the Congress and their Attorneys - Why don't you repeat those scenes to remind all your viewers the kind of Justice we had then. It might help Oliver North [Reagan's National Hero] refresh his mind and all the Voters in Virginia. I am sure he could boost his Popularity and win his Parties nomination. Back then all this unlawful Proceedings were secretly held in the White House and We The People had our Heads in the sand Worshipping a President and all his men C Span didn't know - The White House Press didn't know - Washington Post or Times - or Congress didn't know - only the Foreign News Reporters knew - I ~~do~~ can still hear President Reagan saying "That's a Damn Lie!" when it was made Public - Ed Muse had to tell Reagan it was the truth - also where were you

in Granada? in Panama? but I will give you
Credit for Desert Storm - that was the first time
I heard or saw Peter Aron - otherwise we would
have had to believe every word we heard from the
Pentagon briefing

Now you would like for us to believe "White
Water" is worse than either Water Gate or Iran Contra
But "White Water" happened in Arkansas and Bill
Clinton was not President or in the White House so
how can Congress say they have the right to
Investigate Arkansas - they just have the Right to
Investigate the Executive Branch of Our Federal
Government - they have no jurisdiction in Arkansas -
The FBI or CIA might - but not Congress - if
they want Justice with what Bill Clinton did in
State Government they had better clean up Iran Contra
or solve the "Thief of Promises" from the Inland
and the death of the Journalist who died mysteriously
and they ruled it a suicide when we still don't know
because the Republicans removed his body and his
brief case (with his evidence) embalmed his body before his
family was notified of his death and the Republicans called
in a Sand Sanitizing Co to clean up the Journalist's
Hotel Room before a Investigation (FBI and Justice Dept)
could get in. I think I got this information from
C Span - show it again. And Brian Lamb acted as
though "Lawrence Welsh's" Final Report on Iran Contra was
^{the only source} announced to be available in Paperback for \$15.00 (Condensed
form) - but I tried to buy a copy - Was this Classified

ley the C D A? - I know what I heard and it
just might have been announced on C Spar or
C N N - I dare you to have Lawrence Welsh on
Book Notes or have you heard of "Spiders Web"
by Alan Friedman? - that would be very interesting
[All about Illegally Arming Iraqi through B N N
Loans - that will never be paid back - how
much did that cost Our Tax Payers?

So you see C Spar - you told all this
and now you are covering it up - cause you have
White Water from Arkansas and you are playing
it to the hilt - cause you and the Press are working
for George Bush's Conspiracy to oust President
Clinton - Shame Shame - I used to believe you
and trust you that I was hearing the Truth -
Nothing but the Truth - Now you have another
Suicide that smells of Murder (you might investigate
the C D A for that - it has something to do with
plane loads of Illegal Drugs landing in Mexico
you would like to wipe Arkansas off the map - and
not because of The Clinton -

I've had my say - I'll never hear from
you - but I just wanted to remind you - I have
a good memory of what I heard on C Spar, C N N.

Thank you for all your information in
past White House Administration
