Dear Mr. Lamb,

My well-socialized friends at Bell Labs advised against my broadcasting "Save C-SPAN 2" email because it is NOT a work related problem. They suggested the netnews/usenet network, but I only know how to download messages not post them. However, I DID send the electronic fax below to my cable company "attention: president sales & marketing."

Dear C-TEC,

The purpose of this fax is to request that you extend reception of "C-SPAN 2" to 24 hours a day and eliminate the commercials you place on it.

* Most C-SPAN programming consists of live, on-the-spot
 * transmission which the archive-oriented CD-ROM technology
 * proposed for the new transmission "super" highways will not
 * be in a position to deliver. Therefore, C-SPAN, like CNN
 * will ALWAYS need to be carried via satellite/cable because
 * their programming is "live" (unlike HBO and "movie" channels).

Please do consider my request for commercial-free, 24 hour, transmission of C-SPAN 2. There are many of us here at Bell Laboratories that are C-SPAN fans.

My personal channel selections (prioritized) are:

C-SPAN
 C-SPAN 2
 The Learning Channel (TLC)
 American Movie Classics (AMC)
 WLIW (PBS in Long Island, NY)
 WNJN (PBS in New Jersey)
 WNYE (Educational in Brooklyn)
 Discovery
 Arts & Entertainment
 Mind Extension University (MEU)

Thanks for your time and attention.

Sincerely,
 [REDACTED]
