Sirs:

I am sick of everytime, I turn on your station, there is someone on talking about how the Republicans want to cut the School Lunch Program. Nothing could be farther from the truth. The only thing being cut in Washington about the school lunch program is the commount of people in Washington who take huge chunks of money out of the program. I have been watching your channel because I thought it would be more fair in its presentation of the news. The main stream press takes the liberals view of the news. You seem to be following the same track. The liberal line seems to be to repeat the lie over and over until people will believe them. The Republicans have the numbers

to back-up their assertions that funding will increase for the school lunch program, yet most talk shows will not repeat those facts. As a republican rep. said, look who the federal workers have contributed to the most and you will find, federal workers have given the most to democratic candidates. Look at who screamed the loudest when the congressional ~~were~~ workers were downsized and you will find it hard to see if the democrats are representing the American people or the federal workers.

Will you please show some balance? Please show the republican point of view on this question. I voted democrat for 22 years. I watched how they acted during the 103rd congress and was driven away when I saw them in action then I am now proud to be a republican and I don't see changing back anytime soon.

I have enjoyed your programs in the past. Won't you please show some balance in your programming?

Sincerely,
