Dear Mr. Lamb:

Surely I am not the only person in this country who is grateful to C-Span for carrying the Economic Conference from Little Rock.

There is no other way I would ever have the opportunity to hear such people speak. We are in the heart of "Get a shovel and clean out the barn." country.

I have never liked math nor economics and thought I would be too bored to watch, but it was fascinating and educational.

It is maddening to see or hear such as USA Today, Dan Rather, Tim Russert, Lou Dobbs and Alan Murray sneeringly dismiss the conference as a "dog and pony" show.

It occurred to me while listening to people so much superior to me in knowledge that there is one way in which I am equal; that is as a voter.

If more voters have an opportunity to hear such programs as the conference, the common denominator office seekers have to appeal to might be raised a notch or two and it would be less necessary to recruit ignorance.

Yours very truly,
