Dear C-Span,

I watch your programming almost daily and enjoy it very much. Your services help keep Americans atuned and connected with the activities of the national government which effects all of our lives. This summer I have been chosen to serve as an Intern in the office of my Congressman - Representative Phil Sharp (D-2nd district).

I found out about this opportunity through his office and had no previous knowledge that such opportunities existed. Personally, I feel that running a program/ programs on these type of opportunities might help to interest the youth in government and build a sense of civic responsibility that Americans hold so dear.

It would be great if you could have a crew follow and interview interns and pages to give people and especially young adults - a sense of the workings of Congress

and Congressional offices, as viewed from a new perspective.

Please continue your superb coverage. I truly appreciate C-Span and C-Span II. As a future US History / Government / Geography teacher, your dedication to providing this service truly encourages me and I'm sure will be a great resource in my future classroom.

Thanks for your time and service!

Yours very truly,
