Dear Brian Lamb,

Before I let you have it (nicely) —

I love you and C-SPAN! Okay — I am finally have had enough of your skipping some of the First Lady's Hillary Rodham Clinton's speeches and announcements. Especially on May 18th, when the First Lady was to announce funds for refugees in the Balkans. You did not even show it. But you did manage to air "the Congressional Trip to the Balkan's Conference! I waited all night checking in on both C-Span's to see if you were going to air it.

There are a lot of other speeches that were not shown (they're all govern. related — C-Span worthy) — from the Netherlands, UN in N.Y., etc. I've never bothered to listen to her before, until lately and I just feel you are ignoring her. How am I suppose to learn

what she has to say if you don't air them?

Another troublesome matter, it really annoys me! Your camera (people) work is the pits - : Jarring, people walking in front of the camera's, showing only one side of the podium platform - during press dinners, etc. Never showing the other side of the podium. You don't show everybody, but one side. What is wrong with your camera people anyway? There needs to be an improvement - Tremendously! You do not show enough camera angles and views of everything!

Sincerely,

artist
