I enjoy your show. Unfortunately it is our only means of communication with our "representatives." Hope they watch.

You asked on Sept. 20th show, regarding 50% voter involvement, "How can we turn that around?"

Just by having "representatives" in ALL areas of government INCLUDING Secret Agencies, care about and look at and listen to domestic needs. They have all become more involved in other countries than they are their own.

Washington D.C. doesn't know, can't relate to, and is disassociated from the real day to day reality of our lives. So how can they represent us or meet our real needs. They represent their own agendas-political, financial, international interests and issues that do not help me one bit. The majority of people in the U.S. are STRUGGLING and tired. Voting does not help or change our real concerns in the least. Washington, government bureaucracy is like a foreign nation unto itself. We the people are CUT out.

we aren't told the inner workings
of what's OUR business, funded
by OUR money. We are excluded
from the most important details
of government activity. It's "top
secret", "sensitive", "national security"
bla bla. When I watch confirmation
hearings that go secret I say, then
if their business is not considered my
business I'm not paying for it
and I'm not voting for those who
proclaim to represent me. They
cannot represent me when they don't
even know my wishes or needs. They
cannot know my feelings because they
exclude the people from the most
far reaching critical business of govt.
We the people have no say in the
Federal Reserve. We have no say
in the intelligence business. We get
no communication or info from MOST
of the most expensive powerful
agencies of government. So why the
hell should we PRETEND involvement
by voting. And why should we pay for it?
All these activities we the people
don't even know about, we don't NEED.
What we DO need, food, shelter, peace
and space to live and nurture our
loved ones, we don't have. We

work too hard for too little. We spend our days and lives on a treadmill. We never have security which is not the governments security. Security is having a home and making a valuable contribution to ones social environmental reality. People cant feel at peace when they never feel at home. We can never feel at home, rooted, grounded, when we cant even afford to own a house. This treadmill keeps us forever in need. We cannot relax. We cannot say "This is my space. No one can interfere with my home or my life." We cant say that in this society no matter how long or how much we work and pay. We must keep paying our whole lives into the system just to be allowed to exist on this our own planet and in this our own life. Where does government get the right to dedicate my life and all life to one way of functioning, to one concept of social behavior, to one perception of nature and Being? Life (mine or anyones) is NOT given by the state. Evolution does not proceed by legislation. Humanity, and all organisms, is governed by many

forces. To attempt government through
abstract disembodied institutions
and formula (ignores all the other
signs) and inherent guidance, instinct,
collective consciousness and 'natural'
biological holistic knowledge we all
have. Indeed government attempts
to override all such other governing
forces in our experience. Were the
people in power in touch with their
greater body, they wouldn't need all
those regulations, amendments and
bureaucratic mazes they create. We
don't need them. **THEY** need them for
job security (their own). The more
complicated they make government,
the less we can see, understand, or
change. That is why so many
don't vote. Government is exclusive
and irrelevant to our real needs and
our real lives. Our real needs are
few and basic. We need our resources
of minerals, people, money, etc to **APPLY**
to our real needs. They go everywhere else.
Our resources fuel every kind of
process and product while we remain
insecure regarding our most fundamental
desires i.e. food, shelter, work and a
healthy environment. The people in
power do not know or care what a
serious struggle just surviving here is.

Government assumes we the people can afford to pay for all our own needs and also pay them trillions to pursue their too numerous other agendas foreign interference industrial corporate interests etc. We cant. I will not watch my own home family health suffer while government takes MY money to do 50 000 other things - many secret - which not only dont even concern me but indeed hurt me, my planet and my own country. I'm NOT paying for wars when I cant even afford a roof or a car or food beyond two weeks. I'm not bailing out crooks in the banks. Banks wont even talk to most of us when WERE in financial need. To get loans or credit you have to prove you dont need it. I'm NOT forgiving @llie North for his LIES, COVER UPS, MANIPULATION and THEFT of MY taxes to secret personal causes I didnt approve. I'm not foregoing my own basic security and my own life home, and consciousness while government and corporate interests consume all our resources and money for one narrow definition of lifes purpose which for them is business, profit, and control.

Everyones purpose in life is NOT
to (buy, sell, produce) objects and
generate capital. Life, evolution
and nature is much more than
that. That we the people are not
free to live or create or pursue
any system but the governments
system is WHY people aren't voting.
Its also why so many are depressed,
drinking, drugging, and becoming
more violent. This culture is not
a culture, its a business. We cannot
live in peace be left alone, have
time or money enough to feel secure.
We are all forever in debt via taxes
to the government. This is not freedom.
Its not peace, its just indenturement.

Did you know theres millions of
people in this country who have not
only stopped voting theyve stopped
paying taxes. Why does the press
ignore that very telling fact?
People are fed up. Please give
them an ear. The press is their
only voice.
