Dear Mr Lamb,

You have a very fine man working with you in the name of Peter Slen.

I watch you every morning as I'm a retired 74 yr old school teacher who enjoyed teaching English and especially grammar, (a set of rules that set up the correct usage of our English language).

My one pet peeve is the media's mis-use of words - most egregious - is the word democratic. It is not the democratic party. It is the Democrat Party, and the Republican Party. There are 2 parties Democrats and Republicans - notice - we can place an s on the end of each word to identify it as a Proper Noun. and it becomes Democrats. To describe party we must use another Proper Noun in front of Party - Democrat Party - Now Democrat becomes an adjective to describe the kind of party.

The liberals have over more than 40 years made it a point to mis-use this word to create a "hyge" word to describe their party knowing it is incorrect. They don't care as long as they can use words to create

an agenda for their party. This misuse is a type of censorship.

Mrs. Gloria Steinem was very proud of the day she got President Carter to change family to families in order to represent a number of different meanings of family other than a mother, a father and children. Also the mis-use of the word gender which is used in grammar - They don't want the correct word sex used because they have added many choices.

I listened the day quite a while ago when a gentleman called about Democratic on your scoreboard on your tally board when the House votes. He was cut short. He never got to explain the correct use of Democrat Party.

I hope I have made my point.

Sincerely,
