Dear Sir:

I am hearing impaired and am interested in your programming schedules for both channels that Closed Captions are routinely provided. If there is/are printed schedules available please advise on how they may be obtained that show which are provided with Closed Captions.
(see Robt. L. Linder)

I have seen a few where various Senators or Congressmen carry on "arguments" for their ideas about the subjects being considered. What I don't understand is the lack of closed captions on hearings, on speeches by the President or Vice President, or programs of information presented by the White House Press Spokesman. Please explain.

Also please explain why the members of the House speeches are each with Closed Captions (limited to 5 min?) that are obviously intended for the people in their specific districts or states.

Respectfully

P.S. ① If you offer videotapes, is it possible to identify (by list) the tapes about HEARINGS? with closed captions. If yes, please provide instructions to obtain either with or without captions and the charges for each.

② If you know of hearings that are transcribed or where a list of those available could be obtained please provide the name of the service and the address. Phone numbers are not too helpful for deaf people unless it is a TTY number. (which I don't use.)
