4 19-94

I listen to the endless debates. My letter appeared in

[REDACTED]  
To stop the slaughter  
The attack must aim at the  
homes & hearth of the civilization  
disrupting world peace.

Can you think of any  
more civilized solution?

Damned if I can!

love ya,

[REDACTED]

Seems there's no point calling; Takes too long to get you.

## Sex drive not bad in the White House

In the silent movies comedian Raymond Griffith played a hero who plunged in love with four lovely girls. He was admonished to make a choice. His choice was a Conestoga wagon with the four young ladies sitting under a banner, proclaiming Utah or Bust.

A man with no strong sex drive wouldn't be worth two hoots and a holler as president. Instead of yammering "sleaze" every time marital infidelity is mentioned, we should thank God we're getting a man who has the guts to cut a fine mare out of the herd and fight for her.

There are gigaproblems but only one direction; to the future with its risks, challenges and choices. Democracy is too precious to be left to the mercies of brambles and pullets.

This was 8-92

## Tread lightly in Yugoslavia

A nation, strong enough to be chosen peacemaker to the world, must use its power peacefully. The Serbs, and every aggressor nation we face, now or in the future, must know we wish them no harm.

Tell them; you are making a mockery of your religious beliefs. We ask you to gather your family, your food and personal possessions and get out of town. To make our purpose clear, we intend to level your capitol.

In the quiet hills, where your artillerymen are destroying Bosnian towns and villages, search for peace. After the capitol we will destroy your cities, one by one, until you have found a way to live together in peace.

Find new leaders. Men with peace in their minds and hearts, rather than their old religious and economic hatreds. Gather your weapons; destroy them. Divide your country if you must, separate but equal, peacefully.

The UN will feed and protect you, help you find an ethical peace, heal your wounds, care for you and your children, help you build a new habitat for humanity.

Religious hatreds were good enough for the Bible. We must find a better way. Unless you are hellbent on destroying your country, please: Get out of town. You have two weeks.
