JUN 26 REC'D

Dear Sirs:

JUN 27 AMST

Again I must commend you for one of your broadcasts. While Nelson Mandella was giving a speech saying what some people wanted to hear, we saw on C-Span the Mayor of a South African town telling the truth about him! For a long time I have been discusted at the one sided picture given us by the press and interested parties. The bias of those who claim to be reporting the truth has become so obvious over the years one dispares of ever understanding what the real people of Black South Africa want. Or of even knowing who they are!

Is there a conspiracy of distortion going on? And should American citizens be pushing the people in this country into a cause they are totally ignorant of? I would like very much to hear from the Zulu chief the A.N.C. have been trying to kill for many years. The last time I heard him speak I was impressed.
