I have worked as a journalist in Germany most of my life. Life for Jews in Germany today consists of threats, terror, fear, and murder. The situation is extremely serious and the media is transmitting stories that scarcely scratch the surface of cruel reality. A critical situation is brewing in Germany.

By ignoring the facts and failing to inform the public, the media is promoting the Nazi movement in Germany. My story concerns the rise of Nazism and the abuse towards Jews. In Germany, I have been the subject of newspaper articles and I have appeared on national television. I may be the first Jew to leave Germany due to the rise in Nazism in Germany for many years.

During Hitler's time, many claimed, "We did not know." You must know! I can offer you uncensored news, revealing the real concerns of Jews in Germany today. Antisemitism must be documented and fought - not with violence, but with the moral support of our fellowmen.

If you would like to hear my first hand account of the murderous rise of Nazism in Germany, please contact me. I assure you that your viewers will appreciate an opportunity to hear the truth. I look forward to hearing from you soon.

Sincerely,
