Eating breakfast early - Husband turns on C-Span, Steve sets tone for next 3 hours. Definition of set & so on.

Ever notice how often his finger works independently of his brain. Finger inadvertently lets off caller who has the nerve to say something positive about Pres. Clinton. When your Republican buddies take over, I'm really excited to think that you will tell us all about their sex life. The standards have been set by you & your ilk!

Does Mr. Scafe own C-Span or is it Mr. Murdoch? Surely it isn't my cable money supporting an Impeach Clinton Network!!!
Picked out your next victim???

It's Your
Day

Steve
