Thanker, Keep up the Good Work!

and tell the whole staff of C-Span
I said thank you, and to whom this
may concern, Thanker for making
those letters you have to read
bigger to get the names and
address where to write your guest
speakers.

I don't have a fax machine, I
can't afford a phone call, so
the next time you have a journalist
on who covers the Washington
White House, could you please ask
them these questions for me,
and I repeat I did not make up
these questions or hear them on
Bush Limbaugh, or just at my D.W.S.A
of And meeting

If the President of the United
States ~~and~~ deliberately broke the
laws of the Constitution, and your
Congressmen does not start impeachment
proceedings or ask for his

resignation from office, can the citizens of that Congressman who live in his district file a law suit against him in federal court for conspiracy to help the president commit treason against the United States?

And this is nothing new, I'm sure you have heard this argument from Nixon to Clinton, and I'm not trying to make trouble for the Clintons, I'm asking because a lot of people my age and others lost their friends and family in Viet Nam.

And this is a question I have never understood the answer too,

Why are our two political parties labeled Conservative and liberals anyway, is that not Unconstitutional?

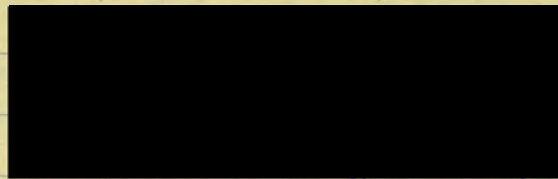

It is my personal believe that that's one of the biggest reasons we are in this mess in the ~~first~~ first place. And the Constitution is the law,

not only one president or political party.

And why is there so much criticism of the republican Contract, they still have to go and debate and appeal half the laws ~~of~~ Clinton administration passed. I think all of the laws and write new ones, and if the public doesn't approve I'm sure they will inform congress in the same way.

I only wish the Clintons would show (us) the citizens of the United States the same respect the news media shows them.

Thank You

Hebert, Ind 46342

I hope you can read and understand my letter, I have Multiple Sclerosis, and sometimes it comes out wrong.
