

I watch C-Span because now I can see the people who are elected officials in this country working at their jobs & seeing them making decisions that affect all of us. Usually I can only see them on the five thirty news walking out and just saying what happened at a meeting in a few chosen words. But because of C-Span's being at many committee meetings, House of Representatives I can see all the goings on.

The one thing that pleases me the most & something I didn't realize and that is how many politicians, newsmen & others connected with the spinning wheel of govt have a sense of humor. It's great I've been in stitches laughing with them at them.

The House of Rep. is a wonder, I have to watch it many times because I just can't quite figure out if that is a real occupation or minor league politics not a few, but a wonder that remains a mystery.

C-Span so far had on everything in politics that affects my life. I didn't realize how much the govt did have a shoe in my my door. I became aware of this from committee meetings and many of your call in quest. The more I watch the more I sometimes begin to wonder what happened to free enterprise & I begin to feel free enterprise is fine but just needs to be watched once in awhile!

(2)

C-Span is my idea of daily TV watching & I will continue to do so as long as I can turn the dial! My newspapers, magazines, & C-Span each serve and fill that gap in my life that I feel keeps me up on my own own newsy world. C-Span is the classical music of my political world, so keep up the kind of material you now send over the waves and I will continue to remain your one and true fan

And of course what would T.V be without romance or crushes you might say, boy there sure are some hunks in politics etc!!

Thank You
