

NEVADA

APPEAL

Vol. 125 No. 289

Carson City, Nevada's capital, April 17, 1990

2 Sections — 16 pages — 25 cents

The full story

TO THE EDITOR:

The many news clips on South Africa, which periodically appear on page 2 of the Nevada Appeal, are cleverly worded inadequate reports which deceive the readers of this worthy newspaper.

The recent reports on South Africa black-on-black violence infers that racial separateness (apartheid) is the underlying cause for "black factional fighting."

FALSE!

Nelson Mandela's ANC, and associates, have been attempting to undermine and overthrow the black tribal governments of independent black tribal homelands for years!

Mandela's ANC desires supreme power over all of South Africa, regardless of race, religion or tribal cultures.

If the Appeal readers were adequately informed about the very complex South African society, then they would know that "the whites," who control the South African central government, are in reality a legitimate African tribe with a three-century African cultural history. That is, the Afrikans!

Nelson Mandela is just another dedicated "socialist revolutionary" with a political ideology which may, possibly, turn prosperous South Africa into just another black power, inefficient, oppressive, totalitarian state.
