C-SPAN CABLE NETWORK
PROGRAMMING LOGIC.

although one of my earlier
experiences with C-span was
an unhappy one. Things have changed!

Since that time C-span has
made some valuable, historic
and educational presentations.
as follows: The seminar on the
Mid East. Then the interview with
Bob Strauss. The History of Democrat
National Conventions.

Now - the fascinating Round table
of NASA and other scientists on the
proposed ^{TRIP AND} landing on Mars.
Listening to the minds of these
intellectual wonders reveal
the rationales and proven
science that has been applied
to this great adventure it
makes one proud to be an American
in the company of these great men.

His adventure will be a success
because the Lord admires the
achievements of these men in
the name of Mankind.

Please stay close to this
subject and follow up as the
program develops either for
the success or failure of the
various phases of the program.

a regret that C-span was
not around when we
went to the moon. By the way -
a C-span review of the
moon program would
make an interesting
program. I am sure it
would reveal details
we never saw or heard
of at the time the moon
landing was made.
As a self-starting anthro-
pologist these phases of
mankind history are
wonderfully presented in
the C-span manner.
