My Dear Mr Lamb:- Let's go for America!! Let's go For Americans who love America!! Tell me, if your home was in Russia or some country behind the Iron Curtain could you produce a C-Span? Isn't what we have, "Free Enterptise", worth fighting FOR? Why support those who would destroy this for their own selfish purposes? Our Fore-Fathers gave us the Most perfect blue print, advise, and through their own lives and deeds were models for us to emulate: "By truth and Eternal vigilance will we preserve our Liberty" they told us.

I have asked you and I ask again that you invite Lt. Col. James "Bo" Gritz to be a guest on your call in program. He is extremely knowledgable re the POW's MIA's AND drugs. If for some reason he does not accept invite John LeBoutillier who was a congressman from New York. I suggest you do not alert "Tip" O'Neil about the latter, he despised John LeBoutillier. John has written a book called "Why Harvard hates America" well worth reading. I distributed these when he was running for Congress. He also has an organization called "Skyhook II Project" the purpose of which is to bring our POW, MIA'S home as per inclosure. Believe ME, if you don't recognize there is much more going on that YOU and the American people have no knowledge of and DO nothing about it, you will wake up some morning and wonder what hit you and you will wish with all your heart you had bothered to find out and alert your listeners.

Sincerely,
