

To Whom It May Concern: I like your show, Aug. 28, 1994
except, like all political talk shows, the people seem to be of the
same caliber - It's their business to follow government and the people
involved and I don't believe that they say and think like an
ordinary citizen who follows their newspapers, magazines, T-V etc.
What information allows them to form an opinion about Washington.
My big concern with the crime bill and all the debates I have heard. It
will not stop crime - no bill will, it is up to the family and the in-
dividual what kind of life they want to lead. Education is out there
if one takes advantage - and it is the law kids should go to school,
I at 14 years am the product of public education as my brother was
and all my friends were. We had to be damn sick to miss a day.
On the health bill - the individual on Medicare should show more
responsibility in reporting doctors and hospitals who abuse the
system by over medicating, over testing and over charging, and as in
my case no satisfactory results. I HAVE REPORTED TO MEDICARE and
now have turned all records doctors and hospitals to our Calif.
State Medical Board - The doctor and all assistants operated two
times for a hip replacement that was not successful - Causing me to
undergo a 3rd surgery that was successful, ^{with another doctor} and the bills were less.
Medicare has recovered some money. I am waiting for results of the
investigation by the Medical Board, as I now hear this doctor has other
complaints against him. What needs is for individual to show more
responsibility for themselves and maybe follow the ten Commandments -
"If it is not against the law" Sincerely,

██████████
