RE: All Congress Health Plans are Suspect

Dear Mr. Lamb:

The C-SPAN programs that cover the proposed National Health Care Plans have been very informative and help to get the real facts. However, one aspect that has not received any attention has to do with Congress.

Mr. Lamb, if the Clinton/Congressional Health Care Plans are so good; ask any Congressman why is Congress exempting the Members and their staff from any legislation enacted which would require compulsory enrollment and contributions for National Health Plans? In effect, this makes Congress not subject to the laws it passes for others.

Hope we can hear something about this in the future.

Very truly yours,
