

Fri 9-10-93

Dear Sir,

After watching the 1968 series of the views of so many, I feel compelled to write and give you my view of 1968.

The question was quote "Where were you in 1968 and what were you doing?" unquote

In 1968 I had arrived in Viet Nam as an aircrew member flying P-2V Neptune anti-submarine type aircraft for the U.S. Navy. My job was to fly coastal patrol off the coast of north Viet Nam and check all the ships going in & out of Hanoi. We flew an average of twelve hours a day and were under the command of MACV Maritime patrol headquarters in Saigon. We took pictures, checked deck cargo and estimated tonnages of all ships we came upon during our patrols. We operated out of Saigon, Cam Ranh Bay and Da Nang. I served in Viet Nam for a total of two years and made over a hundred and fifty combat air patrols. I was "in Country" during the TET offensive. While not flying I lived in the Battle Creek hotel and the International Hotel in Saigon.

After my tour of duty in Viet Nam I came back to the States right in the middle of the "happy anti-war" demonstrations

and was ask to leave a Cafe the first day I was back because I was in my uniform & active duty military were not allowed in this Cafe! I was cursed by so called "politically correct" bums at least ten different times just walking down the street! I learned like all other Viet Nam Vets that my country did not give a damn about me and still dont! The same bums that dodged the draft and spit on me are now in my countrys white house and the rest of us are still getting the crumbs while they get the glory!

I am tired of seeing anti-American punks (called "Chips & Bloods") burn down our country when they dont get their wishes! I am sick & tired of bias T.V. newscasters covering up for a Draftdodger Socialist President & his wife! I am tired of people like they have in a Democrat majority Congress passing tax laws to oppress me even further so they can give the money to a bunch of "politically correct" Liberals on welfare! Yes! and I am tired of the Homosexuals and weirds who want to infest

our military with the blessing of our  
so called "Commander-in-Chief"!

If the real Americans in this  
country do not put politics aside  
and start fighting for real, we  
are doomed to lose this country &  
Civil war is comming for sure! A  
race war is just around the corner  
and if we do not "flush" this  
bunch of "Liberal trash" out of  
Congress in 1994 we will be in  
up to our ears by 1996!

All in all you acted like 1968  
was the darkest year our Country  
has ever faced? You have not  
seen the darkest year yet my  
friend!

Thank you

USN (pet)
