Your coverage of the ENGLISH
PARLIAMENT is excellent and having been in
England really adds to my pleasure

I believe you could improve the
coverage of the U.S. HOUSE OF REPRESENTATIVES
by having the "paper shuffler" moved out of camera
range. Play some re-runs and then answer my questions

This morning Newt Gingrich had a paper shuffler behind him

The speaker in the well for the Democrats
always have an empty chair behind them as
the chairs have wheels on them they can be moved

The employee behind the Republican reads
to the gentlemen in the well so in the future
the camera so be for the balance and impartiality

*-Rep Savage spoke after Rep Gungor and
never was there an employee behind him WHY?
