Dear C-Span,

I really enjoyed Carolyn Elips article about C-Span's classical filler music. It was informative & funny. Please send a playlist to a loving C-Span fan. Thank you for being so patient with us when we call in to say that we are disappointed with our "naked emperors". I especially liked one of today's callers when he suggested breathalyzer tests for Congress. There does seem to be too much recreational use of alcohol in Washington, that may largely explain Congress' impaired performance. Sen. Packwood said he received courage from 2 pitchers of beer, & Rep. Rostenkowski recently had an unfortunate drunken driving incident. Nancy, please visit The Hill.
