C-SPAN NETWORK

Please return to your old on-screen graphics. The bright blue and red panels across the bottom $\frac{1}{3}$ of the screen are very annoying, and they obstruct a good view of your guests and interviewers.

As a long time morning viewer I am finding that in the past

ten days I am turning back to my morning newspaper or the major networks instead of watching C. Span.

In addition it also seems to me that you are flashing these annoying blobs on the screen much more often than in the past. If it is an effort to keep the call-ins to the subject, it doesn't seem to be working.
