To CSpan Program Director, Staff, Brian Lamb or to whomever makes decisions on program guests.

I ask you to please have Warren Rudman and Paul Tsongas on some morning program during a call-in time, preferably on a Monday or Friday when you seem to have the highest number of listeners. I know they were on last week-end on Cspan I and II when they appeared before the Arizona and Phoenix newspapers editorial boards. I accidentally caught the program twice at different stages. They have the most understandable figures on the budget and are the most logical and reasonable. I would like to hear their reasons for backing NAFTA in more detail. The Concord Coalition needs more publicity. Their warnings are important and should be better understood. Perot appeals more to the passions and emotions. Another Pied Piper.

Second request: Have someone on who is an expert in World Population, damage to Environment, and the increasing number of refugees on the move. Over population is a real threat and it is obvious we are on the receiving end of the over-flow.

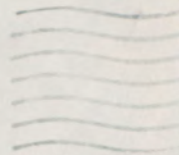

I, too, am among those who wish Noam Chomsky would come on a program. Would he ~~consider~~ an hours interview rather than submit to a call-in? I get mailings requesting support for ~~CISPEB~~ and further investigation into Iran-Contra subject. The letters contain his signature as one involved.

(Correction: the Christic Inst.)

I have listened to CSpan since October of 1983--10 years. I don't seem to stand a chance of getting in. I don't have speed dialing or what-ever gets many callers in. I don't have the time to try dialing for a full hour or more to try to get in. Correction, I do have touch-tone, but that doesn't seem to help. At 74 I will probably be dead before I get an answer from CSpan. Certainly would appreciate a morning with Tsongas and Rudman call-in. It would serve the country well. I have great respect for Paul Tsongas--a profile in courage if there ever was one. At least I got to vote for him in our May 4th Primary.

Thanks much
