This is not a good thing, so called equality. Your calls are not screened, therefore, there was no partiality or prejudice. It is the way things were. This ^{new} system takes away all suspense, too much certitudes now, not enough 'as natural'.

I have never gotten in but have tried many times. I still listen because I like to hear peoples' views. But, why change when you have not tried to make it fair only "as it is."

Polls are rigged. Questions are contrived to get the answer you want. But talk radio and TV are the only real picture of America. Now, you have changed that by creating a contrived rather than natural program.
