Dear Mr. Lamb,

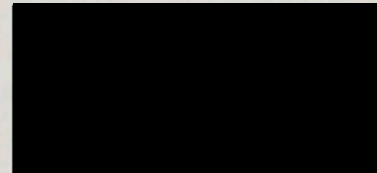

I had a civics teacher at Greenbrier Military School who inspired me. He was a former union member who strived for fair elections-only to be beaten many times. He thought that people can make a difference and should make the effort. After all our history as a nation proves this over and over.

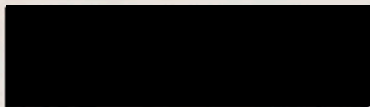

On Monday Sept. 20th, I was watching as you introduced the new C-SPAN School Bus and explained its purpose. I spent the rest of the day calling my friends urging them to write C-SPAN to request that you visit Manchester, TN. Everyone I talked with felt it was a great idea and worth pursuing.

Manchester's occupations range from Aerospace to Agriculture; thus we have a wonderful mix of people from everywhere. Our school systems are rated as one of the best in the state.

While we are not a "major market", our students and citizens would benefit from a C-SPAN visit to the Central High School (about 4 miles off Interstate 24). Regardless of the decision, your cable system does an outstanding job and I'm hooked. Keep up the great work.

Sincerely,

Manchester, TN 37355
