

I

Brian!

\$-W)

Next time when you have republicans on your show and this issue of having people keep ~~save~~ their own ^{S.S.} money "plea" ask them this.

ask them how a low income person can save any amount in order to live on when they retire.

(Low Instance) Most average people make less than \$30,000 a year in factories and other blue collar jobs. So if a person makes \$30,000 a year he would save only \$72,000 over 40 years if the person is aloud to keep their own S.S. money.

● II

Now how much would a congressman who makes 150,000 a year save. It would be 370 - \$400,000 they would save if aloud to keep there S.S. Tax over 40 years.

● Also what about millions of min-wage workers out here. They make only \$10,000 a year. If they where aloud to keep there ^{S-S} Taxes over 40 years they would only save \$24,000 to have for there retirement.

Now ^{anyone} ~~any~~ can see this ^{Tax issue} does nothing for the poor & average wage Earner out here.

● — IT just helps the Rich — a ten year old can see this. So please Brian use these statements To ask Republicans. Thank You!

III

Most americans don't care about a
Tax cut. Because they won't benefit
that much from it any-how. Its
the Republicans pushing this because it
will benefit them and their rich friends.

Surely you and the rest of the
media can figure this out Brian.

Thanks again!
L

IV

almost forgot Brian. Republicans said they want lower income people to have more money in their pockets. On these Tax cuts a min-wage person ~~tot~~ would only save about \$100 or less a year on this 10 percent Tax cut.
(Big deal)

Now if the Republicans really want to help low income earners then raise the min-wage.

Which would increase our yearly wages around \$700.00. That's with for instance a 50¢ an hour raise the first year.

Then the next couple years when it's raised a little it would even go higher. So Tell the Republicans to raise the min-wage if they really want to help us out here.
