Response:

Wash. D.C:

Your Call-in Programs on Monday and Friday mornings have become a joke. I hear many of the same people calling over and over again, and claiming to be in a different city each time they call.

It is obvious they are trying to influence public opinion by pretending to be somewhere they are not.

Most of the people that call express views that are either on the left or right fringe of the political spectrum!

Inasmuch as you are intelligent, discerning people I do not understand why

you participate in this
Charade.

Sincerely,
