

This is up to the minute stuff; unfortunately cannot be sent until Monday.

Mulroney, in a speech minutes ago, looked sad & tired but he's trying to preserve the PC majority. He'll lose the next election because of Meech, & the secrecy of that week-long marathon of the First Ministers, Titin the wringer & all that.

Did you know that the legislative arm of the various Provinces have various names? MLA = member of Legislative Assembly & so. In PQ the Provincial legislative body is called the "National Assembly": nuff said.

Mulroney & his colleagues failed in another aspect. He failed to include the North both Native & white in those Meech discussions. That bothered me - but I'm an American.

I'm familiar with the north; a graduate of Univ of Alaska & a Ph.D. in subarctic topics in Alaska. Brian, I'm not proposing from a biased point of view. I'm white, (grandfather a Yorkshireman) Anglo Saxon et al.

But I've lived & worked with Inuit (Eskimos) for a long time, as a geologist with the USGS & as an engineer with the Territorial Dept of Aviation.

The two casualties of this incredible debacle are Brian Mulroney & Bourassa who both will lose their jobs for completely different reasons. The Inuit will survive as only they can.

I didn't call on the Meech program because I saw him as giving a polemic.
