Dear Sir or Madam,

you have asked for my opinion
on the new station and the programs
that you are producing. So here
goes.

In my opinion, this is the best
effort so far since television was
started, in educating the public
on political activity without the
obvious slant of the organized
news media which are all
liberal and very superficial. It
is too bad that our politicians
won't have time to watch since
they really need to be educated.

I am very distressed when I see
our government supporting the
wrong people and continuing
to do so in spite of events,

you have chosen extremely good
topics and experts to explain
them.

I think you have gone a
long way past Public television
and commercial channels and
commentators.

I wish you much success
and a long life.

Sincerely
