

Dear Brian;

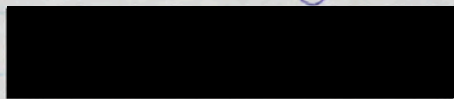

4-1-94

This week you are at U.S. News. What a farce, not you, but they! You've partially shown us what the News Media is all about. It's just what we've always suspected. Show us more! What a sick agenda they have. Someday I envision some strict laws of ethics & morality that the press will have to adhere too. It'll be no ones fault but there own. You ever see the movie 1984? Were halfway there. No-one ever thought Duck Rogers would happen either. They should be focussing on Congress, both parties, for that's where the real power is.

While they are fooling around
with Whitewater Congress, is
passing or thinking about ^{passing} bills
that will affect all our lives,
including journalists, & I'm not
talking about Health Care. That
is necessary. There are so many
other things that are not.
They brought down Nixon, & have
tried to bring down every President
since, including Clinton. So
far they have succeeded, they
may not have resigned but they
either were not re-elected
or their reputations were ruined.
In spite of all this the Country
went on & legislation was passed.
This Country is going down
the tubes & the news media
shares a great deal of that
responsibility. They'll deny it,
but you can't logically argue
with facts. While they've
been fooling around with

all this phony-balance the
"Big Picture" is passing them
right up. They doing us &
in the end themselves a disservice
by their deeds & actions. Focussing
on the wrong issues.

From Ripon through Clinton
they all have more class &
ethics than 99% of the Press.
I'm 60 yrs. old, so all I
live another 40 yrs. things that
are going on are not going to
affect me as much as they are
all future generations. Wake up.
Sincerely

P.S.

You, Jason & the crew keep
up the good work.
