Dear Sir,

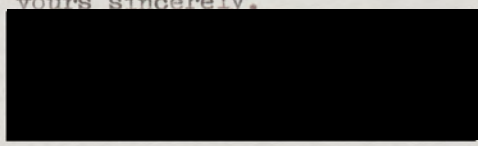

I woke up early morning today - 5.00 a.m., casually made the T.V.on, and to my utter pleasant surprise I saw the LIVE Republican National Convention, New Orleans. The programme was being telecast from Italy - R.T.C.Channel. My thanks are due to you C-Span, Department SKY, that I could view this exciting live convention.

Here in Tripoli, during the summer months, we receive many of the Italian telecasting Channel programmes, sometimes clear and sometimes not so clear. Winters do not catch any channel.

These days we do ^{get} SKY Chhanel, of course via Italy telecastings. I read about you SKY CHANNEL in 'SATELLITE TV' Volume 2, Number 9. July 1988 - celebrating the grand old age of six - and your 12 millionth subscriber. I offer my congratulations.

I would welcome more informations, advice as to how to get more programmes - I mean what type of receiving antenna can I change to and details of C-San & SKY Schedules along with the Convention packet.

With regards,

yours sincerely,
