Your week of radio talk shows was interesting from one point of view-there are a lot of crazy people out there. Ofcourse we knew this from some of the callers to your shows. These shows on radio are the boring of the boring because they go nowheres. They confirmed one thing though; the main theme of Black leadership is that the white world is one massive conspiracy against innocent and loveable Black people. The stink of racism on the part of Gus Savage and Marion Barry was awe inspiring. That reluctance to accept responsibility for their actions is a hallmark of Blacks in general as I have witnessed as an employer for thirty years. Listening to Gen.Powell is as refreshing as a drink of water in the middle of the Arabian desert. Dick Gregory has played the race game all his life and has changed little from the sixtys.

The only minority that has not been given victim status is the white male. Women have it, Blacks have it, homosexuals have it, Spotted owls have it , but not the poor battered white male. The local N.O.W. people are preaching that one out of every three women are raped by white males__ is not that a bit of pathetic tripe?

Please, lets thin out the Journalists you keep interviewing unless they have actual first hand information. If I want mere opinion I can get that from the local bar. We are bing drowned with opinions . We are being drowned in in biased idology. We want more than professional criticisers. No more sideline experts.
