

C. Span Since R. Perato's testimony before the House wasn't covered, will his upcoming message before the Senate be? Since 20% of the people voted for him, shouldn't we be informed? Or do we have freedom of the Press? Please tell me the U.S. media, as I've heard, isn't in league with the Mexico Finance & other Dept's - who I understand has the largest lobbying effort underway offering U.S. media cozy deals that no media is anxious for U.S. citizens to know about. How is it a "positive" in the "long run" for U.S. media to deal with a corrupt government who has their people working with a gun to their heads, many of them children. Of course this includes the Caribbean Basin as well. Explain if you can where lowering our standard of living can benefit the "media" and that includes all branches. We won't be able to afford any of your services be it lower or middle class possibly upper middle class. Are we heading for economic treason - a house divided against itself? How would our forefathers & past veterans view elitism & global thinking - our freedoms eroding. Is this what they fought for?
