

004266 SEP 27 1991, The Netherlands

20 SEP 1991

Dear Sirs,

Today I picked up your signal on the TVS transponder (but with lower strength!) of Eutelsat II F1, using only a 60 cm Astra dish.

Please send me further information on C-span, as offered in your message.

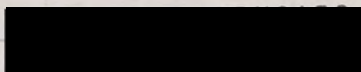

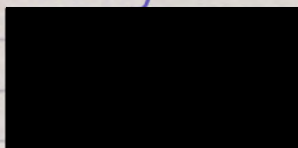

I would also like to comment on an incident in the journalists forum of today (20/9/1991) in which a viewer from the Netherlands asked a question "is there freedom of speech in the USA", which you didn't understand.

However, I think I can explain this!

Namely the point is, that especially the past few years, the information from and about the USA which we receive in Holland via the official media has somehow become more and more restricted, giving exclusively the point of view of the US government, and also giving a strong impression that US mass media have come under almost complete government control. I am not alone in this

observation! Also the range of US films shown
on Dutch TV and in other places have become
narrowed down greatly. In fact, watching
satellite TV was quite a revelation for me
recently, showing other movies and other
news from the USA!

Yours Sincerely
