

Nov. 15, 1991

Sitting here listening to yet another Democrat; Kanjorski.

I have come to the belief that C-Span has joined all the other media taking the Democratic side.

Someone calls up and all we get from them is how bad our President is and how great they are.

Listened to Ron Brown the other day espousing diversity, which is what is wrong with a vast problem in our country.

They listen to all the ethnic groups and special interest groups and not the people. Now I am listening to Kanjorski blaming Reagan for the bank failures. Come on!

Let's keep the President home and send Congress away.

They only work 3 days a week
anyway.

I know this is wishful
thinking, but it would be nice
to hear some republicans
once in a while. I was listening
to Jerry Brown, and it is a
shame people defame him,
because he really made sense.
Hopefully you will have him
on soon.

Another thing. People pay
money to call and when I
hear one of your guests refuse
to answer because they do not
like their questions, that is
upsetting. Why are they there
then?

Why are you committed to
showing the House all the time?

I have been asking for C-Span 2
here for a long time and do not
get it. Why is this?

And another thing, as I will probably ^{will} not write again. Ha! why do you not have two sides to debate when you have a Democrat or Republican on. Like Karjankki right now lying in his teeth. Shouldn't he be followed by someone with another view?

Please do not join the media of bias. Also, I know there must be other issues you could have as besides showing us the same thing over and over again. I know I saw "booknotes" authors 3 or 4 times in one 24-hour day. Just saw the Argentine President for the third time.

How about people that really care about this country, instead of all this rhetoric coming from the politicians.

I guess after all this, you think I don't love you. I do. I have learned more in the last two years than all my 66 years. Not all of it good. I am so worried about my country and have four grandchildren who are facing such problems. I just do not want them to become cynical as I have become.

I have tried for 2 years to get a call though. Never get there. I know this town is a cultural wasteland, but some of us feel deeply.
