

Never

Don't you have any outside lines to States other than California and Florida. I would guess that most Americans don't give a damn about the whole State of California - The land of riots, fires, earthquakes and low IQ's - One would have thought that with people like Robert Dornen the State would have welcomed the illegal Aliens - The States Average "IQ" would have increased.

Is C-Span the chip off the old block "CNN"? Please get California off the phone and listen to some real and honest Americans - I like your program, but one does get tired of listening to California (the State is in bad shape but thanks to President Clinton and the American Taxpayers we are giving them a free ride). Listening to Larry King live show one night Larry had Mrs. Bush as his guest - I had tried to get Larry for 3 years guess who got through that night - Saudi Arabia. One ~~don't~~ gets rather tired of "now we go to the phones BS" - these people are becoming bigger and better liars than the Republicans.

C-span

never
