Dear Sirs -

I've been upset the last few days with some of your news & Callin programs that feature people who are second-guessing the president and our government on affairs in the Middle East.

It seems to me the radical views entirely opposite of the governments action are giving Saddam Hussein aid and comfort plus more ideas for actions against the U.N. forces.

{ Cant you screen your guests away from these radical ideas. } - I'm particularly concerned about a man ~~from~~ on a call in program with Stanfield Turner - who called himself a military analyst - also a program on today on an Am. Call in Program for the Cato institute - Terrible?

An McNeil-Lehrer tonight - Ret Gen. David Jones stated we must be careful about second guessing and wild ideas that could do much damage - and I

whole heartly agree

Respectfully
