Dear Members of C-Span

First I want to thank-you for the tremendous coverage. We as a nation are beginning to build a vocabulary once again because of your network.

With the exceptions of OPB, A Journal Planet now and then, Chris Mathews "Hard Ball" and Bret Hume and Tony Snow Newscast, I'm a total C-Span viewer. We can't receive C-Span II on our cable system thus I'm a viewer of C-Span only.

I've been a Democrat all my life until Bill Clinton, I voted for him the first time, did not make the mistake again.

I worked Nationally for Bobby Kennedy as Co-ordinator for the Youth and can see the Youth of today listening to John McCain in the very same way. Something happens to us as Adults we can be hoodwinked very quickly - Children and Youth can not.

I have been a follower of Alan Keyes and would like to have seen Pa. Forbes-Keyes ticket but I can

Certainly support John McCain - I believe
he can change the direction of this Country.

I'm sad that you can not rebroadcast
Nancy Lock's memorial once again - I missed
the broadcast and can't afford the
Video Tapes in the Archives -

Thank-you for the Library of Congress
tour - and for airing some of the
Book Notes on C-Span I for many of
us who do not receive C-Span II. I
talk to our Cable Service every week. They
still haven't made the decision and I've
been talking to them for over a year.

I worked as a Flight Attendant on
the East Coast for several years - and
spent alot of time in New Hampshire
during my free time - Had visited
Robie's Country Store, sent a letter to Mr & Mrs
Robie last week and received a letter and
photo back, also have heard from Dixville
Notch after all these years - What a treat
it's like going home. I've been in love
with New Hampshire most of my life.

I'm writing this letter because I can't get in
by telephone - I'm teaching children this
Summer and need a favor if possible.

Please send me information about your
Organization and a Photo of the Crew if at all possible.
Keep up the Excellent Coverage.
Sincerely,

Perkellaton, Oregon 97801
