

opinion

Dear C-span

I'm sure it has been brought up before so there must be a reason why you don't do it, but it sure would be helpful if during roll call votes where you show the vote tally, you would display on the screen the composer and title of the music you are playing. There is nothing more exasperating, for example, than trying to remember which of some one hundred Haydn symphonies is playing.

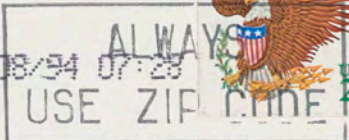

Respectfully

Portola, CA 96122-5120
