

I've tried to call but
The Jan, Republicans must have better 3/9/93
phones, they get in more.

1. For balance, you need to have more poor & middle class ordinary people - unemployed people, (especially ones whose companies left them to go overseas get workers for \$1. an hour no benefits but charge outrageous prices to us. Consumers while same U.S. taxpayers must support unemployed with Food Stamps, Medical etc.
2. IF ^{groups/} Foundations under (501c3) receive corporation ^{rich people's} contributions (taxes given there have to be made up by middle class ^{lower} working people) Rich & powerful politicians, economists others working there have the best government jobs program going, They influence the government with theories but before their information is honored they should have to work out here with lower classes and live their life. Poor don't have cable, or C-SPAN.
