

Gentlemen/Ladies: 2/3/98

I firmly believe you have contributed to our malaise and inertia while our ship of state sinks for likes of Toqueville chatters.

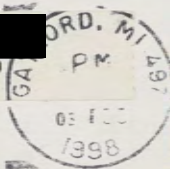

Natural law teaches what is right, what isn't. A growing public debt is the greatest danger to a republican form of government. We are all crooks to make our children pay for our profusion their servitude to get our \$17 trillion debt. Our next president should be Pete Peterson, his book FACING UP-How to rescue the economy from crushing debt should be your bible daily until debt is paid off. Thanks for trying.
