

Dear C-Span Call-in Hosts,

we will never have a proper balance of news to inform the people so long as the Nolan Finleys, Detroit News, with their six figure salaries completely dominate the news media. These very sharp sophisticates live in their own world, do not know or care to know about the rest of us. They naturally relate and are biased in their opinions to the high income classes.

Nolan Finley agreed with a caller that the unions were too demanding, which could be correct however he is probably sympathetic to top level management who demand and are given outrageous salaries, who are the real culprits that really cleaned out and destroyed companies.

The people are pleading for an advocate of the majority, whose only options ^{now} is to read and listen to what there is and remain silent. Even the political candidates dance the monolithic news medias beat, we have no choice.
