Mr. Jack C. Clifford
Colony Communications Inc.

Providence, R.I. 02901

Dear Mr. Clifford:

I am writing to you regarding C-SPAN 2 and its lack of availability in our viewing area. I am of the opinion that it should be included in your cable programming. I am also of the opinion that C-SPAN and C-SPAN 2 should be made available to all viewers who have access to cable systems. I base my opinion on the very nature of the programs and the services that both C-SPAN and C-SPAN 2 provide, not only in the full time coverage of Congress, but of public policy and political events as they happen. This is important in our Democratic society.

I am cognizant of the cable industries funding of this business venture and to a little extent the problems of channel capacity and general viewer request as it relates to popularity in certain areas. The cable industry should put in the forefront the question of C-SPAN and C-SPAN 2 and how to make it available to all who want it in their homes all across this country in the not too distant future.

In conclusion I ask that Colony Communications Inc. give my request the serious consideration I think it warrants. Thank you very much.

Sincerely yours,

Monroe, N.Y. 10950
