Dear Sir:

The pro-life rally in Washington yesterday was a colossal success, turning out a record 600,000 save-the-babies people. The National Park service estimate was 500,000 plus.

Despite this authoritative figure the best number the three pro-choice major networks and CNN deemed to announce on their evening broadcasts was 200,000 by three networks and CBS was reluctant to even give a figure, merely stating that 'thousands' showed!

What a cop-out! And how long will it take for the anti pro-life media to shape up and be honest enough to acknowledge the facts of LIFE ! ?

C-Span is to be highly commended for their three hours of continuous coverage of this event. The few minutes the networks devoted to it was laughable when you recall the build-up and time allocation they showered upon the baby-killer mob when they recently assembled in D. C.
