NOV 12 REC'D

Mr. Brian Lamb

This is to congratulate you and C-Span for bringing us the news of what our Congress is doing. Now we can see what we elected to represent us. The recent coverage of the budget showed us what is really going on. CMM also brings us some news that we can't seem to get from our newspapers and other media.

Is there a possibility of having some Congressmen on some of your Q & A programs that are not all for our going into a shooting war with Saddam Hussein? So far all of the people that have talked on most of the Q & A programs seem to be all for getting our young people killed or maimed over there. Are there any Congressmen that are not Hawks?

Maybe I'm wrong but the impression of another war coming is in all the

media. I hope I am wrong. The President has done an amazing job during this Mid-East Crisis and I'm sure everyone is proud of the way he has gotten everyone of the members of the UN to go along with the sanctions against Iraq.

What worries me now is that the administration seems to be trying to get the country prepared for a shooting war. Our men should be over there in Saudi Arabia to prevent an invasion of Saudi Arabia, but I don't want to see any more body bags coming back to be buried here. There is nothing over there, in my opinion, that is worth 20,000 or more dead young fathers and husbands and sons and daughters of ours.

P.S. Please do not

publish my name or
letter. Thank you

Sincerely Yours
