Normally you do a great job of covering political issues but to-day, you screwed up first class. I'm not anti-semitic nor do I condemn the gay life style but to give the gaips and the Holocaust Memorial priority over Ross Perot's address re NAFTA is indeed lack of proper planning. You didn't have enough camera equipment I was told. Don't you think that jobs in America and keeping jobs here instead of exporting them using slave labor is really a greater and more important issue than gaips the holocaust next time be sure you get your priorities straight
