HOW WILL NAFTA EFFECT YOU?

NORTH AMERICAN FREE TRADE AGREEMENT

1. American companies are continuing to downsize in order to stay competitive. With NAFTA in effect, American companies will be forced to compete against Mexican companies paying a minimum wage of \$.58/hr.
2. NAFTA food standards will allow U. S. banned pesticides on imported foods from Mexico. (Article 904; NAFTA, Page 9-2)
3. With the size of our federal deficit, we can not afford to improve our infrastructure. Under the NAFTA agreement our tax dollars will be spent to improve Mexico's infrastructure. (Article 720; NAFTA, Page 7-39)
4. Mexican truck drivers will be allowed to drive in the United States without adhering to the same safety standards that govern American truck drivers. (Annex 913.5.A-1; NAFTA) *will*
5. With easy access across borders the U. S. will become wide open for easy transportation of illegal drugs.
6. NAFTA would create incentives for manufacturers to relocate to Mexico to avoid enforcement of environmental regulations. (Coca Cola has recently purchased 30% of Mexico's largest beverage manufacturer)
7. We are being told by Government officials that NAFTA side agreements will eliminate the problems it creates, but in reality, side agreements are not enforceable.

NAFTA would affect us all in MANY ways
Above are just a few.

Dear Congressman:

I am joining with other concerned Americans in opposing NAFTA!! I hope that you will represent our country's best interest by voting against this treaty.

Secrets of The Federal Reserve:

Look at the money in your wallet. The bills say "Federal Reserve Note," yet the constitution never contemplated our national bank being taken over and run to benefit the super rich. You see, "The Federal Reserve" isn't federal-it's a private bank that makes money by "making" money. And guess what, it's owned and controlled by the same people who are bringing you "The New World Order." Here's the book that traces all the facts and tells it like it is. A 201-page documented hardcover book by Eustace Mullins.

Betrayal of America

Mr. Funderburk is the former U.S. Ambassador to Romania and watched from the inside as the Bush administration supported dictator Nicolae Ceausescu until finally the people of Romania rose up and executed Ceausescu and his wife. Why did Bush and the State Department love the butchers of Beijing? Funderburk shows how the Reagan-Bush administration greased the skids for Red China to become a major supplier of consumer products in the USA while American factories closed. While the family and pals of Bush made fortunes from global trade, millions of workers in the USA are now unemployed and losing their homes! The U.S. trade deficit with Red China is second only to that of Japan! A 152 page softcover book, profusely illustrated and authored by David B. Funderburk.

Genesis Revisited

Is Modern Science Catching up with Ancient Knowledge?:

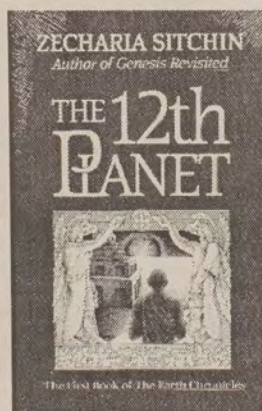

See the Russian photo of the mysterious cylinder that appears to have shot down the PHOBOS' martian probe spacecraft. Then read WHY! Newly published photos of strange objects on MARS that we have not noticed in other works. The Voyager 2 spacecraft fly-by of Uranus in 1986 and Neptune in 1989 brought sharp pictures and evaluation of planets that were previously only a speck of light to the earthbound astronomer. How is it then, that NASA found them to be exactly as described by texts left by the Sumerians some 6,000 years ago? How could the Sumerians have a perfect diagram of the Solar System then, that we only recently discovered? How does "Planet X" fit a puzzle left us thousands of years ago. Could the Sumerians be the "Missing Link" that archaeologists know was artificial to the evolutionary blueprint? Discover a possible answer for the origin, existence and destiny of mankind by linking the bible to other factual discoveries. A 373-page hardcover lavishly illustrated with maps, diagrams and photographs, by Zecharia Sitchin.

Item #1028...\$21.95

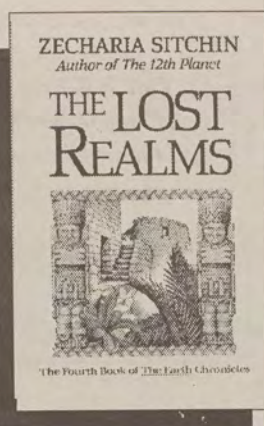

The 12th Planet

Weaving the story of humanity's origins by means of archaeology, mythology, and ancient texts, Zecharia Sitchin documents extraterrestrial involvement in the Earth's history. Focusing primarily on ancient Sumeria, he reveals with awesome precision a complete history of the solar system as told by the visitors who live on a 12th planet in our system that is yet undiscovered. While scientists now suspect that it exists and call it "Planet X", the clay tablets, writings, drawings and artifacts from Sumeria in museums spread world-wide, indicate what really happened. Well-illustrated, 384 pages, printed on special library-grade paper, hardcover collectors edition. The first book of the Earth Chronicles series, by Zecharia Sitchin.

The Lost Realms

How can one explain the pyramids and "Cities of the Gods" and huge monuments in Mexico that were so far away from Egypt? How did the Mayans master astronomy and invent a perfect calendar more accurate than ours used today? Who created the metropolis in the Americas on the shores of Lake Titicaca? These and more puzzles are answered that strongly suggest the involvement of "gods" from a dying planet that made Earth their home. The Ancient Plan of Secret Societies:

Secret societies have cultivated a plan which has powerfully influenced world events. Mysteriously hidden in the mainstream press, the primary objective is to bring the entire world under the domination of a one-world government. Americans that never thought foreign troops would be on American soil will be shocked to learn that U.N. peacekeeping troops are on the way or already here. U.S. citizens will soon learn that the United Nations can control the U.S.A. and we will be subservient to officials that we never elected. How did it happen? Why? Kiss The Boys Goodbye

How The United States Betrayed it's Own POW's in Vietnam:

Bobby Garwood escaped from Vietnam in 1979 bringing the story that countless others were still alive. Instead of a rescue effort, the Government jailed him and shut him up. Other sightings of live POW's by other foreign nationals who now work in Vietnam and recent reports and admissions by our own government that, "Yes, men were left behind", add new credibility to this carefully documented book that indicates how our troops are "expendable" so as not to damage the egos or political aspirations of those controlling our government. The authors are award-winning Monika Jensen-Stevenson who is an Emmy winning producer of CBS TV "60 Minutes" and her husband William Stevenson who is the author of "A Man Called Intrepid". Read how the CIA and others "managed" to keep the issue quiet until now. You will ask, "Why would our government dare to do such a thing?" The answers are here. How Japan's Lobbyists in the U.S.A. Manipulate America's Political and Economic System:

If you have heard of Akio Morita's book, "The Japan That Can Say No" you must read Pat Choate's new book, "Agents of Influence". While America still wonders how former President Ronald Reagan could dare take a \$1,000,000.00 "honorarium" for making two twenty minute speeches, we soon learn that such an amount is chicken feed compared to the 400 million dollars a year that Japan spends to control the U.S.A. by hired lobby groups. These astronomically paid lobbyists are all former trusted government officials who once swore to uphold the Constitution. Not only is your TV "Made in Japan", but the programming on it and movies in the theaters will also soon be almost totally controlled by Japanese owners. Documented, truthful, shocking.
