Marketing Coordinator/Developer:

HBS-TV is a new wireless cable TV company dedicated to serving the Korean-American population through MDS-TV, Channel 6 (approximately 700,000 Korean-Americans) in Southern California.

As of November 1, 1993, HBS-TV will begin to air the initial programs for testing. Since we are a newly booming company, we are asking for your support and assistance.

For many years your shows have been an inspiration and an educational tool for young children across the nation. Now, we would like to use this opportunity to educate and enrich our second and third generation Korean-American children with similar programming. We would like to acquire any (as many as we can) old films you may have, so that we may air them for the young viewers of our station. We will recognize your name in our programs as many times as possible to show our appreciation.

We would appreciate any support and assistance you may offer us. We look forward to hearing from you soon.

Sincerely,

[REDACTED]
President
